Science	FORCE AND ACCELERATION HOW TO CALCULATE FORCE.pptx ● LESSON OBJECTIVE ● Apply the formula $F = m \times a$ to calculate force and explain how mass and acceleration affect force in real-life situations.	EXPLAIN THE PHENOMENON You already know that a force must be applied to cause a change in motion. Just like the objects you used in the activity, when a skydiver leaves the plane, she moves downward. Make a claim about what you think caused the skydiver to fall to the ground. Claim The skydiver falls down because_____. Collect Evidence As you work through the lesson record your evidence. Evidence A. What evidence have you discovered to explain why the skydiver fell downward? B. What evidence have you discovered to explain the relationship between mass and gravity and the relationship between distance and gravity? C. What evidence have you discovered to explain why the skydiver did not move toward the plane? When you are finished with the lesson, review your evidence. If necessary, based on the evidence, revise your claim. Revised Claim The skydiver fell because_____. Reasoning Finally, explain your reasoning for how and why your evidence supports your claim. The evidence I collected supports my claim because_____. Complete page 78 from Unit 2 of the textbook.
